

WoodVANs

LIVE ANYWHERE

WoodVANs Freedom

WoodVANS Freedom

Spacious heated garage with a sliding bottom for convenient manipulation and plenty of space for your cycling toys and other bulky items. We know from experience that putting the bike straight into storage after a trip is not always convenient, so we have a direct outlet connected to a 100 l water tank in the garage. And don't worry about getting the garage dirty. It's all covered with special waterproof material for this purpose. No more cramped spaces! Thanks to the positioning of the bed on the electric sliding system, our van conversion gives you plenty of room for living and sleeping.

We enjoy innovations! Need to charge your tablet, mobile phone, or anything else from USB? No problem! There are USB sockets in the living space for direct connection of devices for exactly this purpose. The energy-saving but powerful RGBW LED lighting guarantees plenty of light in all conditions, and the handmade furniture touches give the interior a unique look.

Quality in every detail - from materials to the design. Want an example? Let's do it:

The hinges on all doors are not regular hinges. We use top quality for long-term durability from BLUM. Don't look for any cabinet handles. Everything is designed for convenient use with push-to-open mechanism. That way, nothing gets in the way of your living space, but you can open everything conveniently even when your hands are full. (A self-closing system is a matter of course).

A bathroom like no other? Yes, because it's by WoodVANS. Our van shower kit containing both toilet and shower guarantees excellent ergonomics and spaciousness for comfortable everyday use.

The Largest Storage and Living Space

The Freedom provides the perfect balance of storage and living space for a comfortable life, even when living on the road for a long period of time.

For 4 People

It offers sleeping for 4 people without any storage space limitations thanks to a sliding ceiling bed for 2 people.

Premium and Quality Materials

Freedom is designed to make you feel at home. That's why it offers an interior made of quality and premium materials.

Storage Space

Would you like 4x4 drive, a solar system or maybe add USB slots? No problem. We can do almost anything as an additional extension.
