WoodVANs Experience

WoodVANS Experience

"Absolute freedom and liberty" is the motto that defines each of our models. And yet the Experience model is unique. It offers great variability in interior layout and is suitable for families, young couples, racers, or a group of friends. How you decide to adapt the interior to your needs is up to you. The garage offers many compartments and a special hanging system replacing the classic cabinets with removable storage pockets of our production. The whole interior is intelligently detailed with AirLine rails to make the car a camper for 4 people, a mobile garage, or a sportsman's dream. And there are the obvious features like an awning or an outdoor gas connection that lets you pull out the grill and have lunch on the table in minutes. It also offers our own bed hanging system in the rear and a roof extension with an impressive bed area of 210 x 140 cm.

Quality processing is fundamental for us. We use only premium materials and sophisticated technologies. For example, cabinet handles. There are none. We use top-quality push-to-open mechanisms from BLUM to save space in the living area. Another example is the flooring and lining of the cargo area. You no longer have to deal with every smudge and can simply wash it off with water. And let's not forget the extension of the storage space with our storage pockets, which are tailor-made for WoodVANS.

After a day of fun, when you want to rinse off, there's nothing better than getting in the shower and letting the hot water flow over you. Our van shower kit, which includes a toilet, gives you exactly that feeling.

Just Live & Anywhere

Design of Experience

Day layout

Night layout

Plenty of Variants

Experience allows you to customise your interior space according to your activity. Bike, kiting, or camping. Experience can handle anything.

Relaxation with a View of the Stars

To save you maximum space inside the car, the Experience offers the option to raise the heated roof and prepare a comfortable sleeping area for 2 people.

Sleeping and Travelling in 4

Besides sleeping in the raised roof "bedroom," the Experience also offers two folding beds in the car's garage. This makes it easy to travel with the kids or a group of friends.

Storage Space

The garage and the rear door of the van are provided with a number of storage compartments, newly with a special system of removable "cabinets" with two functions: storage space or sports bag.
